

# Considerations for Tangibly Reducing Inequity in Water Resources Management

## Main Equity Barriers

1. Vague definitions of equity
2. Misbelief that equity metrics do not exist (qualitatively or quantitatively)
3. Difficulty linking equity to current standard project management frameworks
4. Lack of clear examples of equity being incorporated into management

Incorporating equity requires effort in 3 major dimensions

## Foundational Blocks Building towards Equity

Progress requires *iterative adaptive management* to consistently address multi-dimensional equity needs.

Addressing Barriers 3 & 4:  
Integrating Equity into Infrastructure

Addressing Barriers 1 & 2:  
Characterizing Equity
