Subject: Comments for Feb 15th Meeting on the Delta Conveyance

I am very much against the proposal to siphon more water from the Sacramento River Delta. The Delta is an ecosystem that needs fresh water, both for the wildlife living there as well as the small farmers that call this place home. Please do not approve this destructive project. We need a comprehensive policy on water use in the West and should be limiting water use to agricultural practices that are not in sync with our constant drought. This project is short-sighted and will be disastrous to the ecosystems in the Delta.

Thank you,

Samantha Smith
