Summary: Current law provides that unless a city or county within the Sacramento-San Joaquin Valley makes certain findings after the effective date of specified amendments to its general plan and zoning ordinance, the Planning and Zoning Law prohibits a city or county from entering into a development agreement for property located in a flood hazard zone; approving a discretionary permit, ministerial permit, or other discretionary entitlement for a project that is located within a flood hazard zone, as specified; or approving a tentative map, or a parcel map for which a tentative map was not required, for a subdivision that is located within a flood hazard zone. Those findings include, among others, that the local flood management agency has made adequate progress on the construction of a flood protection system that will result in flood protection equal to or greater than the urban level of flood protection in urban or urbanizing areas. Current law further requires urban and urbanizing areas protected by any levee that is part of the facilities of the State Plan of Flood Control to achieve the urban level of flood protection by 2025, with specified exceptions to the deadline for the Mossdale Tract and West Sacramento. This bill would remove the specified exceptions to the deadline for the Mossdale Tract and West Sacramento, and instead provide that the deadline to achieve an urban level of protection, or to make adequate progress on the construction of a flood system providing an urban level of protection, does not apply to the Mossdale Tract and West Sacramento so long as a flood management agency has an active federal study, a completed federal study, or an authorized federal project receiving or awaiting the receipt of federal appropriations to advance design, construction, or project closeout activities, as specified.
