# Managing invasive species in a changing world

**Resisting change through active control efforts is effective when sources of invasive species are not nearby or connected**

**Resisting change is less effective when nearby populations of the species can spread easily.**

Keller et al. (2025), *Journal of Applied Ecology*  
<https://doi.org/10.1111/1365-2664.14881>

## **Delta Science Program Activities**

- **Delta Science Plan** update
- **Healthy Rivers and Landscapes** peer review complete

## **On Your Radar**

- **October 14–15: Adaptive Management Forum**
- **December 4: Sixth biennial Delta Invasive Species Symposium**
  - “Modeling and Managing Invasive Species for Tomorrow’s Delta”
- **Golden mussels** update
- **Social Science Extension Specialist** update
