Twin Cities/ Lambert Road

IMPACTS

Productive farm and pasturelands would be replaced with reusable tunnel material area, access roads, railways, shafts, shaft pads, and industrial-looking equipment, which "would introduce large-scale industrial-looking features and prominent elevated landforms to a landscape that is currently predominantly flat. These features would be visually discordant with the area's existing characteristics." (Quote: project FEIR, Appendix 18D-3.)

The "reusable tunnel material area" is a stockpile with an indefinite lifespan, because there is no plan for dispersing it.
