

Emerging Climate Science Symposium: Walk-through of Summary of Select Documents

September 10, 2025

Virtual (Zoom)

12:00 – 12:45 PM PDT

Event Details:

A Summary of Select Documents is being used to inform the Delta Independent Science Board's **Emerging Climate Science Symposium** from September 16-17, 2025. This document synthesizes the current understanding of climate stressors and hazards associated with the Sacramento-San Joaquin Delta from publicly available documents. This document was created with the assistance of Google's artificial intelligence tool, NotebookLM, which is a platform that enables users to upload source documents to generate summaries or ask questions. Notably, these summaries include in-line citations that link directly to the original sources. A 15-minute walk-through followed by 30-minute Q&A session will be hosted virtually by Dr. Anna Michalak of the Delta ISB to showcase the use of NotebookLM to create the Summary of Select Documents.

Join the session **here**.
