Subject: Sharing SCC's White Paper on Alternatives to the DCP

Good afternoon,

My name is Caty Wagner and I am a Sierra Club California organizer and I heard that there may be some questions around the feasibility and necessity of the Delta Conveyance project. Sierra Club California opposes the project as it is extremely harmful to the Delta communities, Northern California Tribes, and the ecosystem of the Delta. We wrote this [white paper on alternatives](#) to the Delta tunnel in 2019, and I thought it may help to share it with you. Please let me know if you have any questions. Thank you for your time.
