Subject: Re: Public Comments at Today's Delta ISB Meeting

Hi Edmund,

Thank you very much for following up.

In order not to overwhelm anyone, I would like to draw the ISB's attention to just one document at this time. It is the peer review of the fish models used to produce the original Tuolumne River Voluntary Agreement. This peer review was commissioned by NMFS. I believe it will provide some good insight into what to look for in the Scientific Basis Report. It is available at the following link.

Please let me know if there's anything I can do to be of assistance to the ISB.
