Event Details

Join Delta Lead Scientist Dr. Laurel Larsen, Maggie Christman (Delta Science Program), and Clint Alexander (ESSA Technologies) for a conversation about the upcoming launch of a publicly searchable, interactive tool for accessing information about Delta science activities: The Delta Science Tracker. The Delta Science Tracker will house information related to funding and collaborations involved in research and monitoring efforts and provide users access to products of those activities.

Missed an AMA?

A recording of each month's session is saved to the [Delta Stewardship Council's IGTV](#).
